

Reference **Hexa-Cover® Floating Cover**
Application **Agriculture – Slurry Tank**
Result **Elimination of odor and emission**
Location **Altona, IL 61414 USA**

For controlling odor and emission of ammonia, David Erickson, “Triple E Farms”, Altona, IL 61414 USA chose Hexa-Cover® Floating Cover for his slurry tanks.

“I installed the Hexa-Cover® Floating Cover on my new 67' diameter Slurrystore in June 2009. It spread out just like the company video shows!

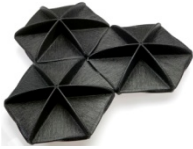

I have another Slurrystore that I try to maintain a straw bio-cover on. The Hexa-Cover® Floating Cover structure has less odor because its surface is almost completely covered while some of the straw has sunk or moved in my other structure. The straw also adds to the solids in the structure.

The Hexa-Cover® Floating Cover looks like they will last a long time. I believe that over time, the Hexa-Cover® Floating Cover will be more economical and more effective than a bio-cover. Unlike a bio-cover or fabric cover, the Hexa-Cover® Floating Cover should also be maintenance free for many years” ends David Erickson.

Hexa-Cover® Floating Cover Qualifies for EQIP Funding (Environmental Quality Incentives Program)

**Hexa-Cover® Flydelag**

til eliminering af Lugtgener, Emission, Fordampning, Organisk / Alge vækst, Varmetab og UV-effekt

Hexa-Cover® Flydelag

bruges på alle typer laguner, reservoirs, tanke etc

Hexa-Cover® Flydelag

applikationer: Vand, Spildevand, Kemikalier, Olie, Afkog, Perkolat, Gylle etc

Hexa-Cover® Floating Protect Cover

To eliminate Odor, Emission, Evaporation, Organic / Algae Growth, Heat loss and UV effect

Hexa-Cover® Floating Protect Cover

Is used on all types of lagoons, reservoirs, tanks, ponds etc

Hexa-Cover® Floating Protect Cover

Applications: Water, Sewage, Chemicals, Oil, Decoction, Leachate, Slurry, Manure etc

Schwimmkörper Hexa-Cover®

zu beseitigen Gerüche, Emission, Verdunstung, Organische / Algenwachstum, Wärmeverlust und UV-effekt

Schwimmkörper Hexa-Cover®

verwendet auf alle Arten von Lagunen, Behälter, Tanks, Reservoirs u.a.

Schwimmkörper Hexa-Cover®

Anwendungen: Wasser, Abwasser, Deponie, Chemikalien, Öl, Abkochung, Sickerwasser, Gülle u.a.

Hexa-Cover® Couverture Flottante

afin d'éliminer Les odeurs, des émissions, évaporation, organique / la croissance des algues, la perte de chaleur et d'effet des UV

Hexa-Cover® Couverture Flottante

utilisé sur tous les types de lagunes, réservoirs, citernes, etc

Hexa-Cover® Couverture Flottante

Applications: Eau, eaux usées, produits chimiques, pétrole, décoction, lisier, fumier etc

Hexa-Cover® Cubierta Flottante

para eliminar olores, emisiones, evaporación, Orgánica / crecimiento de las algas, la pérdida de calor y el efecto de los rayos UV

Hexa-Cover® Cubierta Flottante

utilizado en Todos los tipos de lagunas, embalses, depósitos, etc

Hexa-Cover® Cubierta Flottante

Aplicaciones: Agua, aguas residuales, productos químicos, petróleo, Decocción, estiércol, purines etc

Hexa-Cover® Copertura Galleggiante

per eliminare: Odori, emissione, l'evaporazione, biologici crescita di alghe, la perdita di calore e l'effetto UV

Hexa-Cover® Copertura Galleggiante

utilizzato su tutti i tipi di lagune, serbatoi, vasche, ecc

Hexa-Cover® Copertura Galleggiante

Applicazioni : Acqua, acque reflue, prodotti chimici, Olio, Decotto, percolato, letame, liquame ec
